

Automated Electrophoresis System

The Evolution of Tradition

The smaller size for automation in clinical electrophoresis

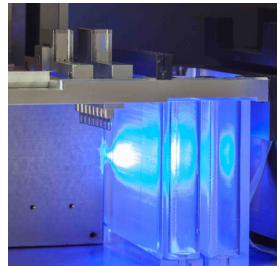

a start project
diagnostic division

Automated Electrophoresis System

Small size electrophoresis system - Improved Automation and Reliability

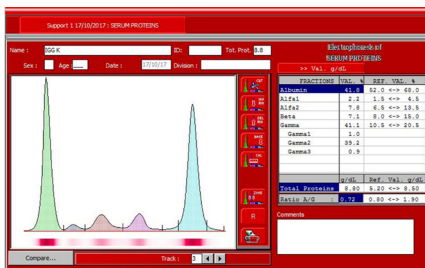

Fully automated and user-friendly system performing all the steps of the electrophoretic process

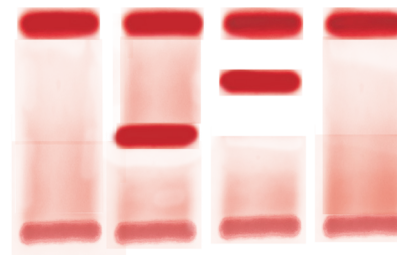

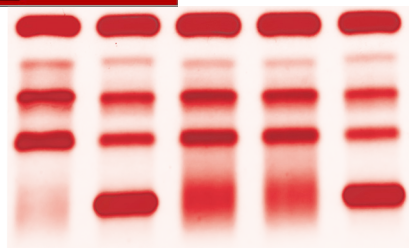

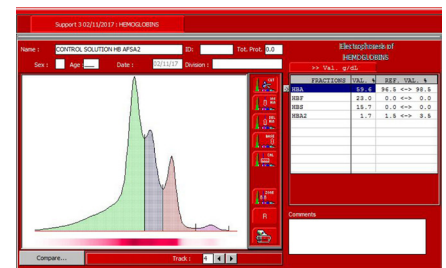

New optical level sensor system for reagents

Versatile - most widely used electrophoretic methods: Serum Proteins, Hemoglobins, Lipoproteins

Complete - software also provides archives for species management (veterinary) and new statistic program

Cellulose Acetate membranes, balanced kits and applicative support

...your partner in Protein Electrophoresis
